**IN THE CLAIMS:**

Please amend claims 1, 2, 9 and 10 as follows:

C

1. (Three Times Amended) A method for the formation of a color image which comprises the steps of forming an electrostatic latent image in accordance with an electrophotographic process, visualizing said electrostatic latent image by a developer transported by a developer support to form a multicolored toner image whereby monochromatic color toner images are formed by mutually independent developing steps comprising a contact type non-magnetic one-component developing method, and superposing then the resulting monochromatic toner images with one another to form a multicolored toner image, and in which method a toner used in each developing step contains an
